

Global risk map  
2016

In safe hands

- Falck Global Assistance
- Falck locations
- Network partners
- Evacuation hubs
- Air ambulance providers

- Low risk
- Moderate risk
- Medium risk
- High risk
- Extreme risk

The map shows security and medical risk according to a colour scale ranging from low to extreme risk. The risk levels are calculated based on medical and security standards in each specific country such as medical infrastructure, environmental, social, political and security factors, e.g. national threats and crime rates.
